

# Repository for Intrinsic Viscous Liquid Dynamics (Radium)

This repository contain code and data for the Radium model of viscous liquid dynamics. The companion paper is

*Intrinsic viscous liquid dynamics* by Ulf R. Pedersen (Roskilde University, Denmark), [arXiv.org/abs/2511.02991](https://arxiv.org/abs/2511.02991)

## Data

The data for figures presented in the companion paper is located in

- `data` - Data presented in companion paper

Data of simulations is in the folders

- `raw_data` - Long-time simulations
- `raw_data_to_t_half` - Simulations until half of the sites have changed.

## Figures

The `*.py` generate figures presented in the companion paper.

## Code to run new simulations

See `readme.md` in the `./code` folder.
